

Care and Keeping!

We recommend all products are...

Spot treated

For drying, we recommend air drying/line
drying*.

We recommend washing the products the first
time by themselves to avoid any possible
discolorization.

*Products with vinyl additions should not be dried in a dryer, and should be laid out flat to dry. In rare instance, vinyl can lift with washing/drying, and ironing on low for a few seconds (with butcher paper in between the vinyl and iron) will re-adhere vinyl. Over heating of vinyl is possible, and can damage all products, as well as vinyl additions. Churchill Corgis is not responsible for any damages incurred to product by the user. Fraying can occur after washing, we do not recommend putting bandanas in the washing machine.
